

Feinstruktur

Style with strength

VEKA

FINELY TEXTURED. DURABLE FINISH.

Feinstruktur [*Fine Structure*] has been developed as a decorative foil that offers the practicality of a durable premium finish, with a finely-textured surface that mirrors the sophistication of powder-coated aluminium.

Feinstruktur provides both practical performance and a distinctive design option within our range of finishes.

The PVCu profiles and the decorative foils are recyclable – supporting the conservation of valuable resources by re-introducing materials into production.

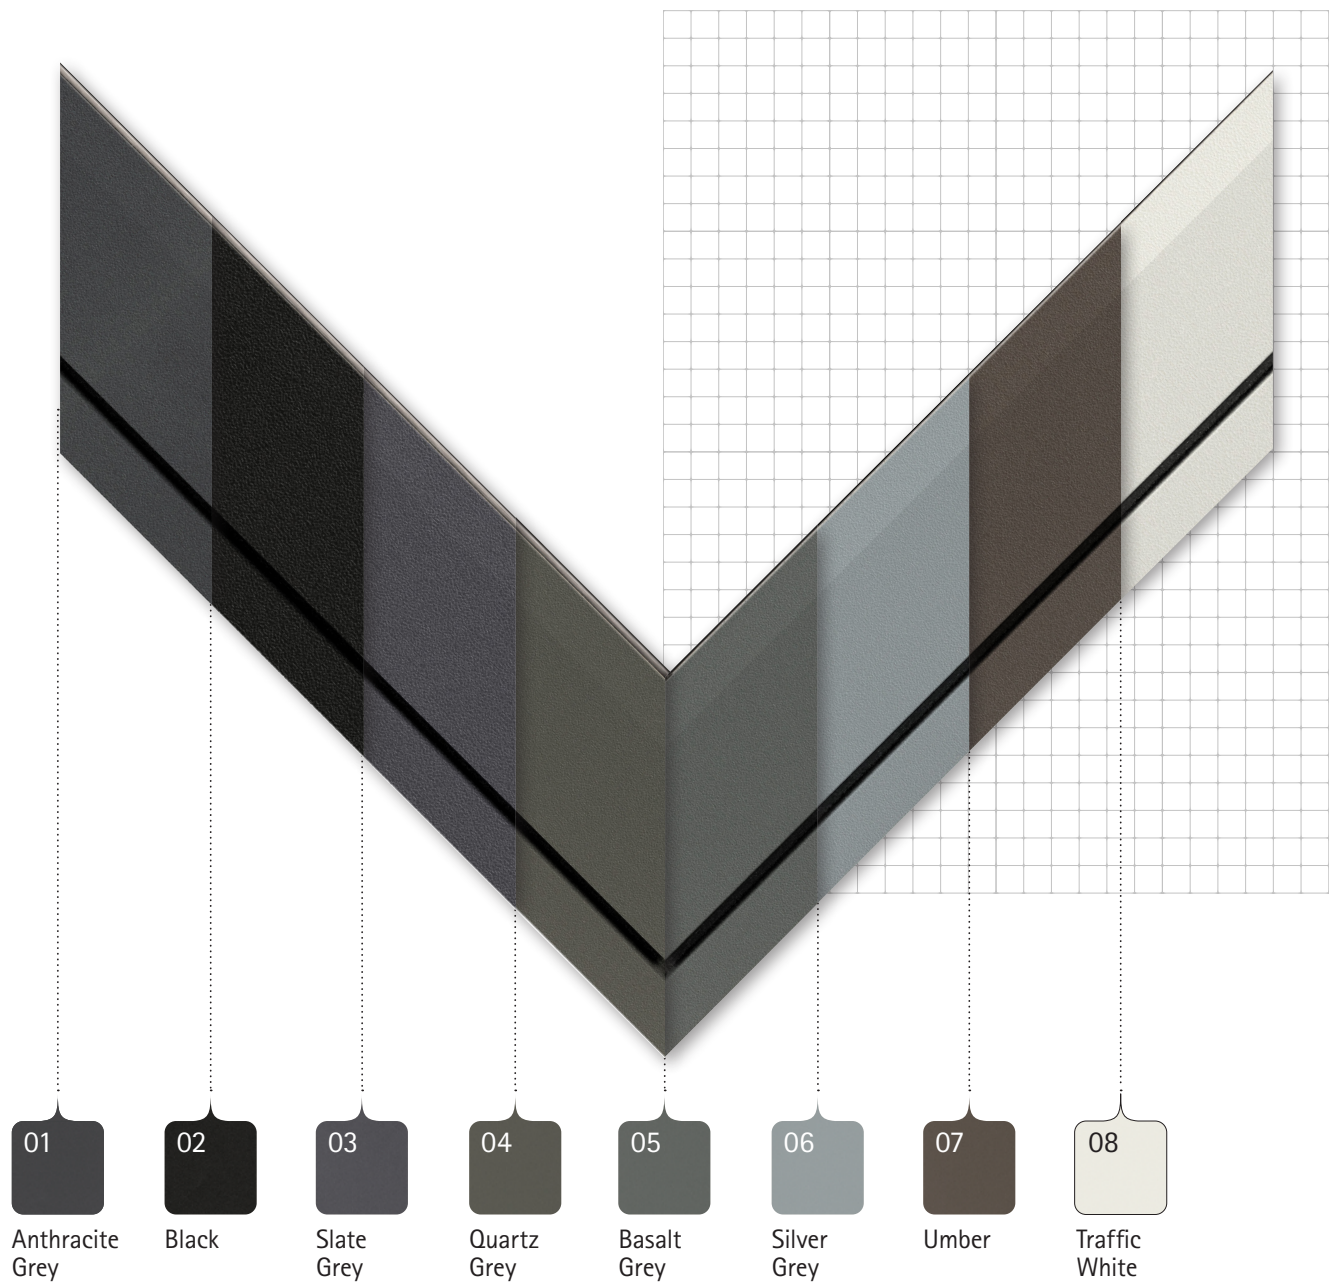

Consistent quality

The surfaces are highly resilient, weather-resistant, and scratchproof, as confirmed by rigorous stress testing.

A PALETTE FOR MODERN LIVING.

Eight contemporary colours designed to complement
a wide range of architectural styles.

Colours are for illustration purposes only, we highly recommend requesting a swatch before placing an order.

Feinstruktur is available in a range of sophisticated shades to create a palette for contemporary or traditional spaces – inside and out. It reflects the latest colour trends while complementing an array of different façades and materials.

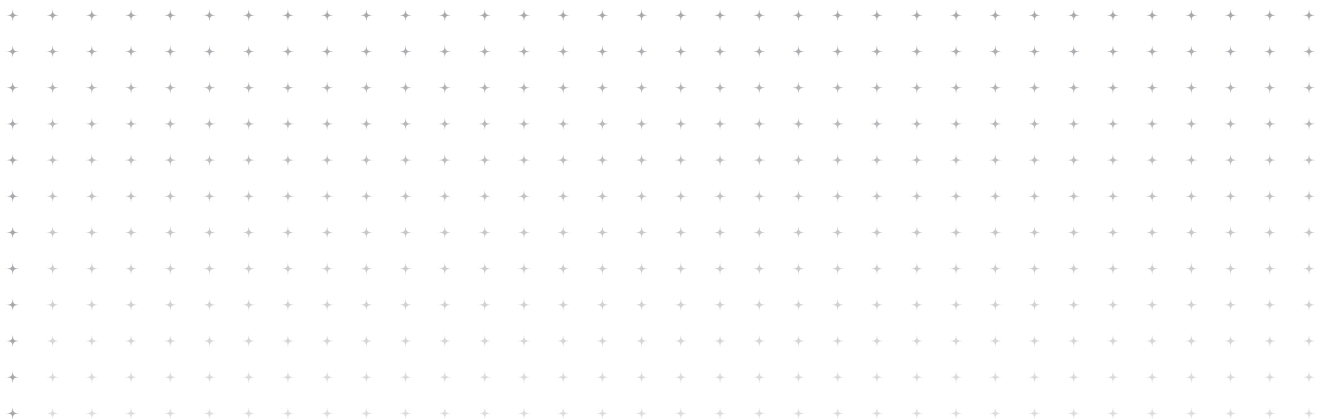

The finely textured matt finish is designed to provide a refined surface appearance. The finish interacts with ambient light to create a soft sheen, supporting a consistent and understated design effect across window installations.

A LEGACY OF LASTING STRENGTH.

We developed Feinstruktur with a finely textured finish designed for long-term durability.

The decorative foil incorporates technology that has been tested to VEKA standards, confirming resilience against scratches, fingerprints, and dirt. The finish is engineered to withstand UV exposure, temperature extremes, and contact with chemicals or cleaning agents. This supports easy maintenance and consistent performance across window and door installations.

Our PVCu profiles and decorative foils are produced from recyclable materials using energy-efficient processes, making Feinstruktur a sustainable option within our range.

A sustainable choice

Made from recyclable materials
using energy-efficient processes.
